

SEM 1 PROJECT 4

B11 UTM

BY KOK MING HUI

CONCEPTUAL PLAN

There is an empty parking space behind the B11,UTM. Based on the roughly idea, due the mostly **users are lecturers and students**, they always have their study stress, thus, **a garden is suggested to provide a recharging area**. Chilling areas are proposed such as gathering area, lawn, exercise area, outdoor classroom, seating area and small garden. Outdoor facilities create a more chilling environment for the users. The users can visit to the area during lunch break, after school or any free time.

MINIMALIST MODERN GARDEN

SITE PLAN

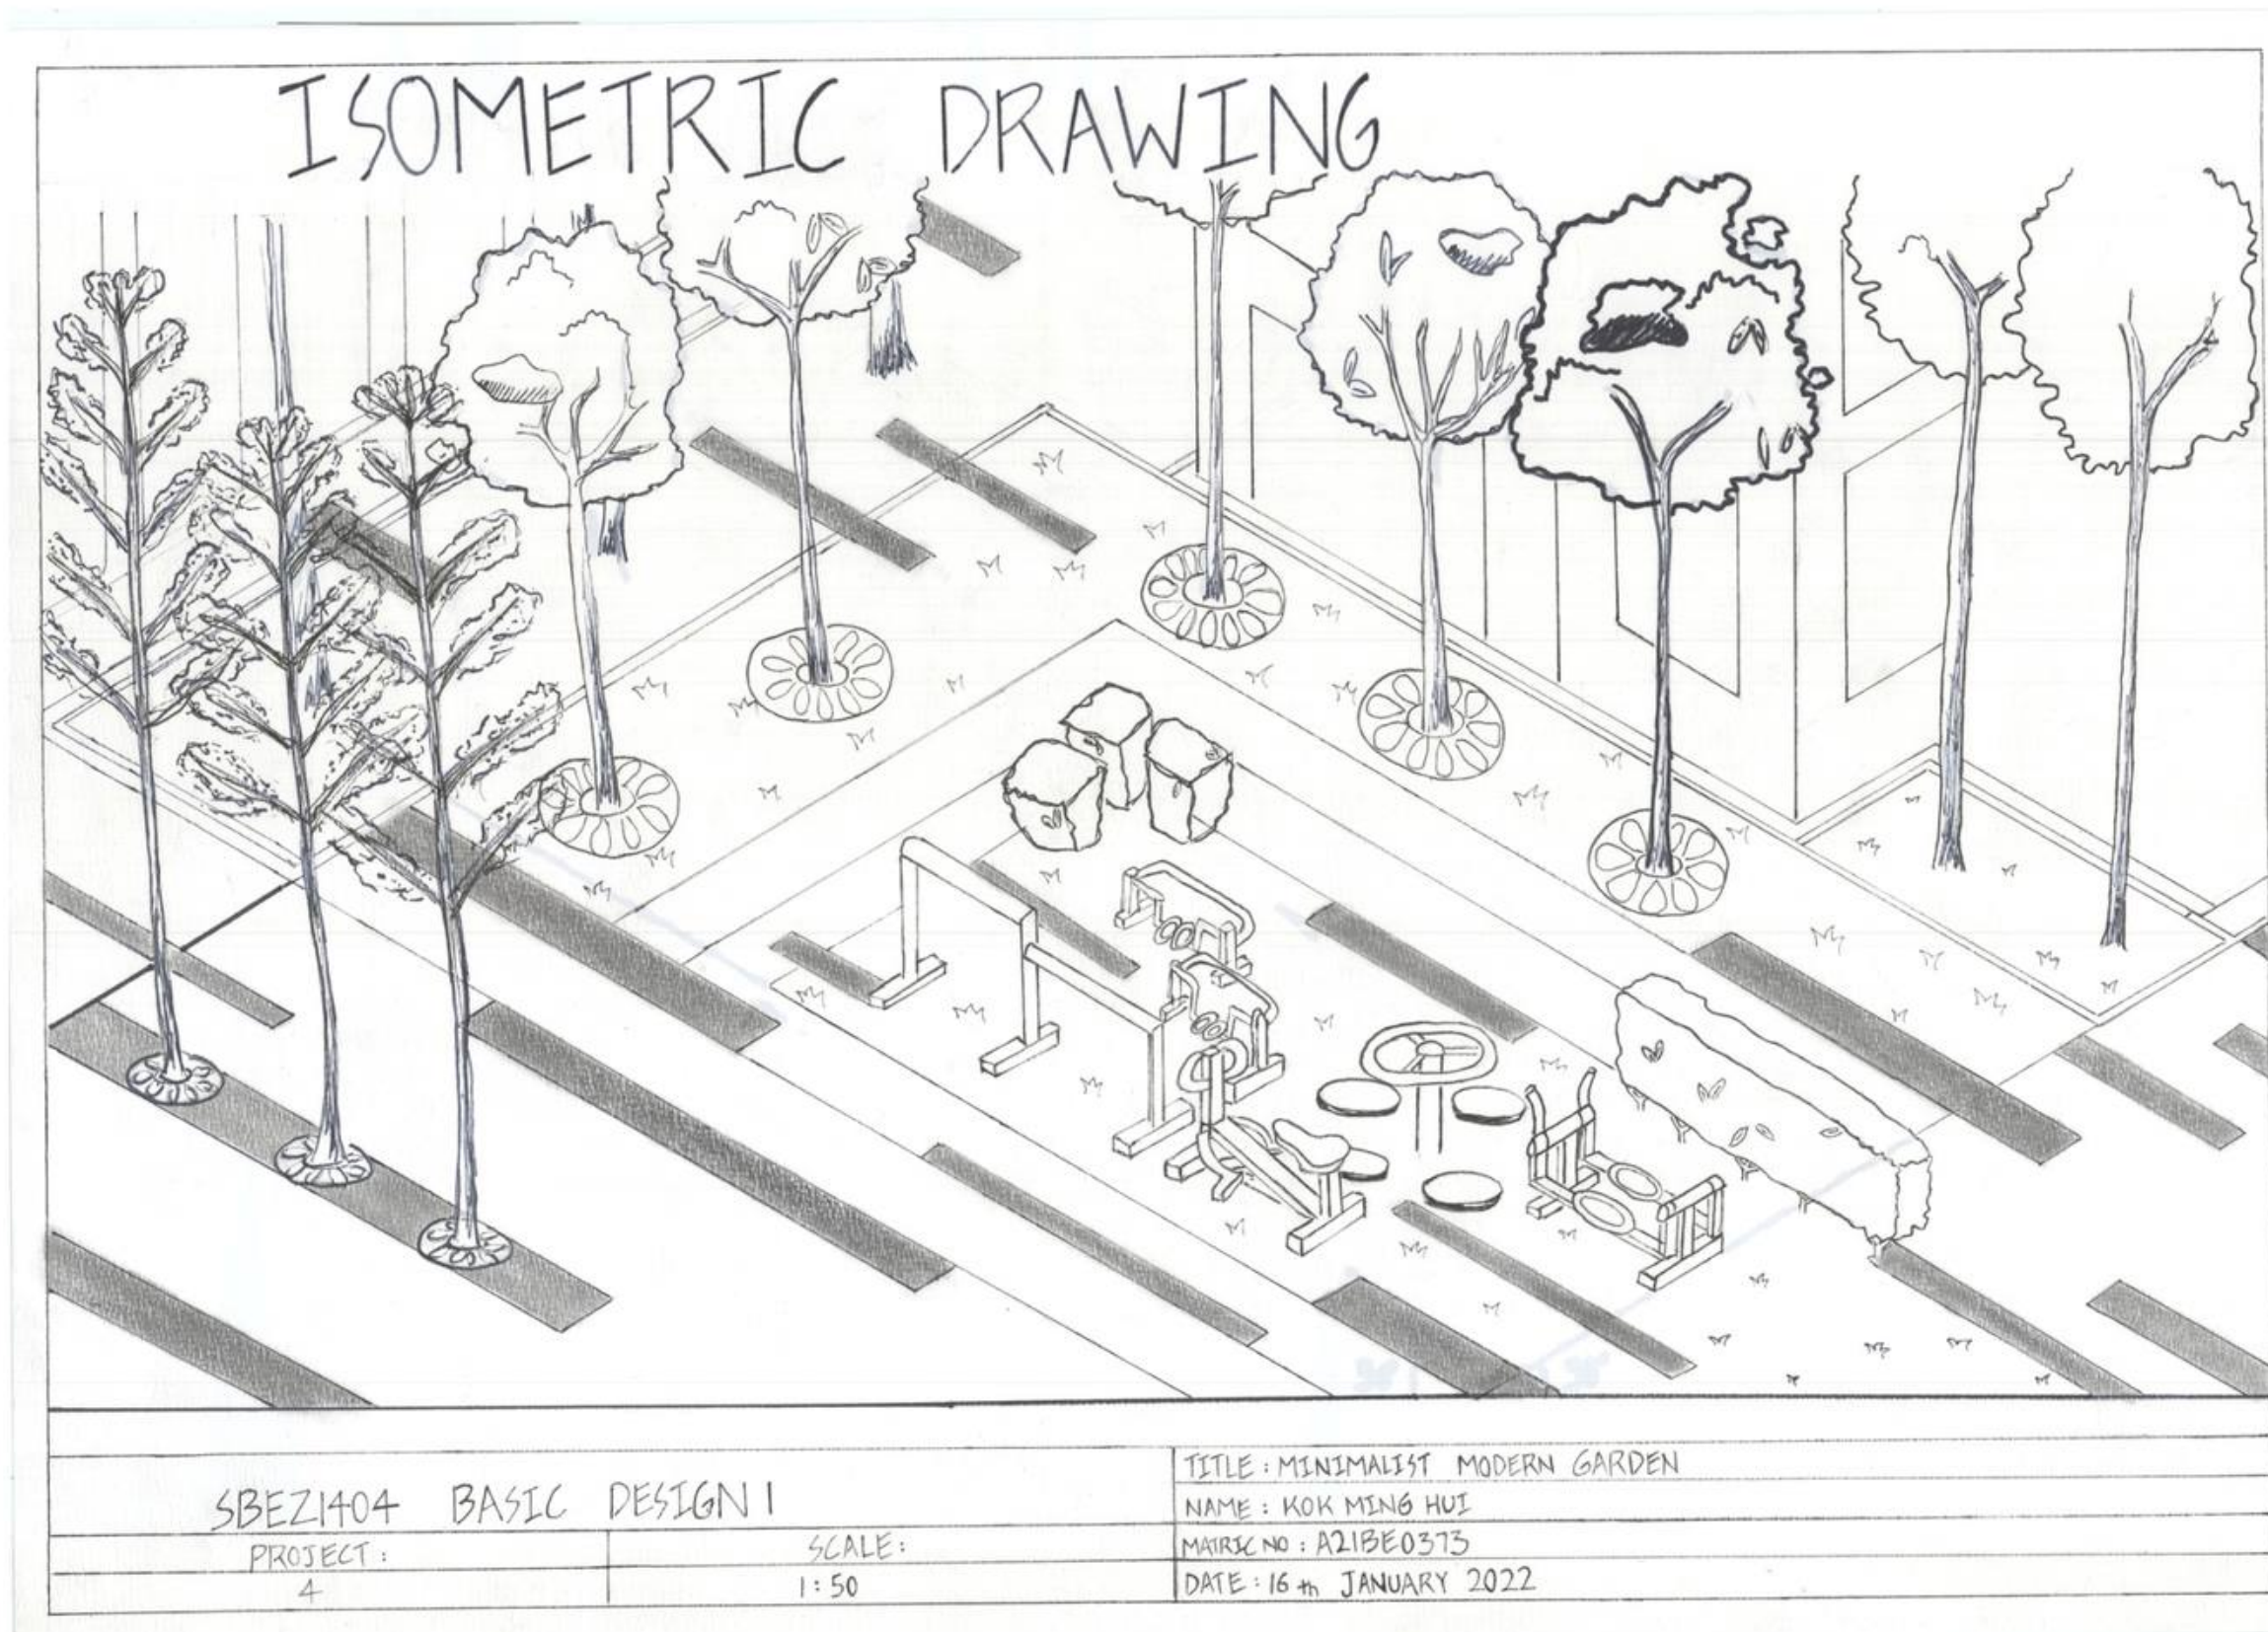

In my design, I would like to **provide variety of spaces for the users so it can be utilized as a chilling area after school.** **Proposing the tree at the surrounding to lower the temperature of the site and increase the interaction between the environment and the users.** **The water features in the middle** also important as it is the center point in my design, also the natural sound of the water provides a relaxing feeling to the users.

SECTION & SKETCHES

ISOMETRIC DRAWING

Showing the whole design of exercise area for the users from different 3D perspective.

PALETTE

The palettes show the hardscape and softscape selections in this project.
