The requirement of the competition is design a balcony in the form of softcopy then transfer into real practical project.

HURAIAN KONSEP
CONCEPTUAL WRITE-UP

TAJUK (TIDAK MELEBIHI 6 PERKATAAN)
TITLE (NOT MORE THAN 6 WORDS)

EVERLAND

HURAIAN KONSEP (TIDAK MELEBIHI 300 PATAH PERKATAAN)
CONCEPTUAL WRITE-UP (NOT MORE THAN 300 WORDS)

The title of the balcony is Everland. The title is chosen because the word Ever refers to evergreen and Land refers to a specific relaxing platform for individual and family. Everland also represents a green space, most of the space in the balcony is equipped with plantings.

The concept of this balcony design is Essence of Esculent. The concept is inspired by the green edible garden. To achieve the purpose of a human-landscape interaction, 5 senses designs are proposed, fragrant and edible plants are provided for taste and smell, circular shape recycled art wall for view, sound from hanging element for hearing and the other elements can be included in sense of .

In this design, 3R concept is implemented to build a sound-material-cycle society through the effective uses of natural resources and materials. Recycled elements such as wood pallet is used to help landfill space by keeping useful materials and cushions are placed to provide seating comfort. Empty plastic bottles are reused and redesigned as flower bulbs on the bamboo grid and climbers are added to soften and complement the natural beauty of the landscape.

There are few types of plantings which are climbers, edible(herbs) and fragrant. Geometric shaped planter boxes are used for the plants and the plants are arranged from low to high in the pots. Recycled art wall shows how the asymmetrical balance is played with the scale, colour, and form of elements. The idea is to keep the user's eyes engaged and promote an overall sense of balance. To increase the visual quality of the balcony, spanish moss plant is hung on the pole as plant curtain to keep the surroundings cool by absorbing the direct sunlight.

In short, eye-catching Essence of Esculent concept design can improve the mental and physical well-being of the user.

We choose the concept of EVERLAND as we would like to create a small personal space filled with greenery in our balcony. We believe that green can calm down our emotion and create our comfortable zone in the balcony.
